# CHRISTMAS FAMILY LECTURE SPACE: THE THIRD ERA

Institution of  
**MECHANICAL  
ENGINEERS**

**IET** The Institution of  
Engineering and Technology

How far have our notions of space and what it means to humanity come in the last 70 years? Dr. Maggie Aderin-Pocock, presenter of "The Sky at Night", explores the history of space exploration by taking us through the three eras of space: firstly, confrontation borne out of the Second World War; next, collaboration between nations across the world, united to establish a permanent habitat; and, lastly, commercialisation. Is this the key to getting us all out there?

Families and children are warmly invited to attend

**28 November 19:00**

Refreshments available from 18:15

Lecture Theatre 1, School of Chemistry  
University of Bristol  
Bristol, BS8 1TS
