WEBINAR

HOW DIGITALIZATION HELPS IN CONSTRUCTION

FEATURING EXOSKELETON INTRODUCTION

Construction industry is facing various challenges in the new era. In this webinar, construction supplier Hilti HK would share how their latest digital technologies can assist enterprises to adapt to these changes. Software support for engineering and economic analysis, services to facilitate fabrication, material cost and time saving, 3D control through on-site technology, digitalization for construction quality management and asset management would be introduced.

Remark: Webinar topic “how digitalization helps in construction” is the same as the one we organized on 23/3 while new topic Exoskeleton is added in this webinar.

Date: 27 April 2022
Time: 18:00 – 19:00
Number of participant: 100
