

Upgrading London's sewer -
Chambers Wharf

Bridge slide across railway, Reading

Process Industries Division
North West Centre

CATASTROPHIC INCIDENT PREVENTION

Institution of
**MECHANICAL
ENGINEERS**

[Richard Roff](#) is an IMechE fellow who is passionate about the wide application of Process Safety concepts across many Engineering activities. Richard is Chair of the UK Process Safety Management Competence Programme [Board](#) and Group Process Safety Manager for [Costain](#). Richard will take us through some real examples of where Process Safety could have been better applied and show its value in infrastructure delivery.

21st March, refreshments from
