

**Salisbury Area:
Annual Arnold Barks Christmas Lecture**

WHAT A DIFFERENCE A WEB MAKES

Institution of
**MECHANICAL
ENGINEERS**

The Institution of
Engineering and Technology

Improving the world through engineering

We are now rapidly moving into a world of data on the Web, which gives us more degrees of freedom and at the same time constraint.

As we seek to understand its origins and anticipate possible futures, there is a need to address the critical questions that will determine how the Web evolves as a social and a technical network, what impact it has had and will continue to have on the world, and crucially who will determine where it is going next.

Lecture by **Wendy Hall, DBE, FRS, FREng**,
Professor of Computer Science and Director of
the Web Science Institute at the University of
Southampton

3rd December 2014 19:00

Doors open **6.30pm** with Coffee/Tea available
Canapé Reception will follow the lecture

Salisbury Arts Centre

Bedwin Street, Salisbury SP1 3UT
