Transforming Waste into Manufacturing Products

13th March 2019

B003, Engineering Central, College
of Engineering, Swansea
University

Lecture Starts: 7.00pm

**Speaker: Damian Walsh, Project
Manager, Amgen Cymru**

Damian is an experienced Director of Operations having an extensive industry background spanning almost 40 years.

This presentation will provide an overview of Damian's latest activities in the establishment of a multi-million-pound Eco Park development at Rhondda Cynon Taf Council's, Bryn Pica Waste Management Facility. Based on the notion of circular economy, the Eco Park will help turn more rubbish into resource by collecting and re-using waste materials produced on site. The Eco Park will be the first of its kind in the UK.
