Improving the world through engineering

Everyday millions of dollars of Oil and Gas are transported safely around the world by pipeline. In order to keep pipelines operating safely operators regularly inspect these assets, without interruption to the supply, looking for anomalies that may affect the integrity of the system. ROSEN, the world's biggest pipeline inspection company, operate a fleet of inline inspection tools utilising many different technologies to locate, size and categorise these pipeline anomalies.

Please join us on a tour of ROSEN's pipeline inspection tool workshop and to hear all about the amazing technology that goes into their intelligent pigging systems.

The tour and talk will be presented by Paul Casson, Director of ROSEN's operations in the UK & Ireland.

### Thursday 27<sup>th</sup> April 2017

Meeting at 6:30pm for refreshments  
Talk and tour to begin at 7.00pm

ROSEN Europe B.V.  
Unit 2B  
New York Way  
Newcastle upon Tyne  
NE27 0QF
