

Ennerdale Water Treatment Works Visit.

The visit to Ennerdale Water Treatment Works was a superb way to round off another excellent IMechE West Cumbria season. What a place to come to work (well, when the weather is as superb as it has been..) The engineering involved in the extraction & filtration of the already superb Ennerdale water was beautifully explained by our two hosts, Brian & John, and the whole works are housed in wonderfully concealed 'farm house' type buildings.

The water from Ennerdale only feeds 120,000 homes in the Whitehaven & south Workington area - lucky them!

A good time was had by all as can be seen from the photos!
