All about fluids, mixtures and something else...

Dear Colleague,

What opportunities can an engineering career offer? Engineering Your Future is a free one day event that aims to provide sixth form students with a practical introduction to a career in engineering.

Organised by the four largest engineering institutions in the UK, **ICE**, **IET**, **IMarEST** and **IMechE**, who are working together to present you and your students with a series of one day seminars to help gain a better understanding of how to answer the above question.

The format of the day comprises four interactive sessions hosted by young professional engineers from different engineering disciplines, and concludes with a careers session, which will be presented by graduates from the university and apprenticeship routes. The careers session will outline the various routes into engineering as well as the financial support available.

Opportunities will exist throughout for students and teachers to ask questions. This is the eighth year that this event has been hosted by the Institutions and due to its success.

Due to the limited number of spaces available at these events, we advise you to RSVP by (Date) to ensure you and your students can attend. Simply email (Name, Email address); please see **Brochure** for more detail.
