REISHAUER

Gear Grinding Technology

Join the IMechE Switzerland on a visit to Reishauer AG, manufacturers of grinding machines for the production of toothed gears. The firm has been making tools since 1788 with an ever increasing level of precision and in more recent decades increasing computer control in their products to produce machines capable of grinding high quality, low noise gears.

The visit will include a tour of their machine tool factory. Arrival is at 15:45 for a tour start time of 16:00. The visit has been kindly organised by Phil Peel.

Thursday, 11th Feb., 15:45

Reishauer AG
Industriestrasse 36
8304 Wallisellen
Switzerland
