

2015 PRIZE COMPETITION EVENING
COMMUNICATING ENGINEERING EXCELLENCE
Recognition of Continuing Professional Development

The Western Aerospace Centre is running its annual prize competition to encourage the further professional development of young engineers living and working in the West of England and South Wales. The competition finalists will be presenting their contributions to leading edge research and development projects to a panel that will include senior engineers from the region's leading Aerospace organisations. The presentation topics are:

Laura Edwards, University of Bristol. Structural Magnetic Composites for use in electro-mechanical applications;

Rafael Luterbacher, University of Bristol. Towards self-healing materials for aircraft applications;

Ryan Marks, Cardiff University. Using Genetic Algorithms to optimise an active sensor network on a stiffened aerospace panel with 3D scanning laser vibrometry data.

Attendance at the competition evening will offer an excellent opportunity to support professional development, network with senior Aerospace representatives and to learn more about research and development in the South West Aerospace community.

Monday 20th April 2015, 18:00 for 18:30 start

Queens Building, University of Bristol, University Walk, Bristol BS8 1TS

The event is **FREE** and open to all. No pre-booking required. Finger buffet and drinks after the event. For more details contact Pauli Markkanen:
